About Me

Undergraduate student in Computer Engineering at UDC, currently on an Erasmus exchange at Linnaeus University. Passionate about software development and open source. Problem-solving oriented, with strong adaptability and teamwork skills. Looking to add value by building efficient solutions.

Skills

Programming Languages: C (Advanced), Java (Intermediate), Python (Intermediate), JavaScript, TypeScript, OCaml

Frontend & Mobile Development: Next.js, React, React Native, Astro, Tailwind CSS, HTML5

Backend, Testing & DevOps: Node.js, Bun, WebSockets, Docker, Linux, Git, pnpm

Education

BS	Universidade da Coruña, BS in Computer Engineering, Computing	Sept 2023 – present
BS	Linnaeus University, BS in Computer Science (Erasmus Program)	Sept 2025 – June 2026
	Universidade de Santiago de Compostela, STEMBach in Mathematics and Computer Science	Sept 2021 – June 2023
HS	IES Ramón Cabanillas, HS in Science and Technology Grade: 9.05/10	Sept 2021 – June 2023

Projects

RealOrAI	Dec 2025 – Dec 2025
Fullstack Developer. Multiplayer game where players must distinguish between real and AI-generated photographs.	
- Developed with Next.js, TypeScript, and Bun, implementing multilingual support and real-time connection via WebSockets. - Images sourced using Unsplash and Google AI Studio APIs. - Over 180 unique visitors in a single month.	
Pásame el Código	Oct 2024 – present
Frontend Developer & Maintainer. Open-source website providing academic resources for Computer Engineering.	
- Architecture built with Astro and Starlight, achieving optimal web performance and maximum accessibility. - More than 15 contributors and 24 stars in GitHub - Successfully scaled to support and manage over 100 recurring unique monthly visitors.	
MandaRef	Feb 2025 – Feb 2025
Mobile Developer. Native mobile application integrating Inditex's Visual Search API to find clothing items.	
- Built with React Native, Expo, and TypeScript, ensuring a fluid cross-platform user experience. - Developed during HackUDC 2025, efficiently tackling the challenge of identifying clothing seen on social media.	
Personal Blog	Nov 2025 – present
Personal Project. Technical blog developed with Astro to publish articles on development and technology.	
CronoSquare	Feb 2024 – Feb 2024
Interactive puzzle minigame developed in HTML5.	
Awarded the GPUL x INDITEX Tech Prize for the most original project at HackUDC 2024, standing out among more than 130 participants.	
Pro2324	Jan 2024 – Oct 2024
Open-source web repository created to share class notes and solved exercises in C.	

Experience

Bar O Pósito, Waiter (Full Time) – Cambados, Spain

July 2025 – Aug 2025

All work experience is important, my experience is little, but it is honest. In this job I did not use any framework but I learned to work hard dealing with the public and adapt to high stress situations.

Volunteering

Spanish Red Cross, Volunteer (Relief and Emergencies) – A Coruña, Spain

Nov 2024 – present

- Logistical support and assistance in preventive events, ensuring the safety and well-being of attendees.
- Teamwork under pressure to apply rapid response protocols in emergency situations.
